the wheel bearing is one part of the hub assembly. I just watched a number of videos on YouTube and it

Is there a difference between a hub bearing and a wheel bearing? The bearings in this assembly are often referred to as being "Hub Bearings" though their function is exactly the same as that of "Wheel Bearings".
 Hub Bearing Vs. Wheel Bearing - It Still Runs
 A major difference between the two is how they are assembled. Wheel bearings can be taken apart, lubricated and reassembled to be used again. Hub bearings are prepacked at the manufacturer's factory and are sold and installed as a complete unit. These cannot be taken apart for re-lubrication, but must be replaced
